Rich,

Based upon the telephone conversation I had with OSC Rupert this afternoon, TechLaw will be mobilizing 2 teams (1 sample team and 1 sample management team) on Jan 10, 2012 and will begin sampling on Jan 11. Sampling will continue through the end of the day Fri and will resume Monday Jan 16. On Jan 16, the second sampling team will mobilize and begin sampling on Jan 17. Please let me know if this schedule is not accurate.

I also wanted to let you know that we have estimated that the laboratory subcontracts for Isotech and for the bacteria samples will be a total of \$ **Ex. 4 - CBI**. I am not sure if you have allotted dollars for lab subcontracts on the TDD. If not, can you please amend the TDD to include these costs?

With the sampling scheduled to begin on Jan 11 it means that EPA labs will begin to receive samples on Jan 12. I called Fred Foreman this evening to check to see if the EPA labs were ready for receiving samples on Jan 12, and he said he wasn't sure. He was going to check with the other staff and get back with us on Monday morning. I just wanted to make sure that Ft. Meade was ready before we started shipping samples to them, especially since on the conference call yesterday they had quite a few things to finalize. Additionally, I believe we need to submit an analytical request and a final sampling plan to Ft. Meade before they give us a Case Number which we need to include on the sample tags. We currently do not have EPA approval of the Sampling and Analysis Plan (SAP). I have attached the draft Sampling and Analysis Plan for your review and approval. Please let me know if you have any questions or comments on the SAP and/or if it is acceptable as is.

Thanks,

Suddha Graves
